The Thistie has the lead keel and the rig of the English cutter, though in her rig her designer has taken many useful hints from American practice. For instance, she has a mainsait laced to the boom, a longer mast and a shorter topmast than is usual in cutters, and sae has a saitspread calculated to make Jha Bull shiver with fear. On the other mad she has a wholesome American beath, the lack of which has been so fatal to late cup challengers. In fine, Designer Watson has taken a good idea wherever he saw it, regardless of its nationality, and he deserves all the more credit if he has tchleved success while working with unaccustomed tools. The farmers of this locality have harvested most of their grain in good condition, and a large crop. This being an agricultural community

a few weeks at this time of the year can well be devoted to recreation and rest from toil, by most of us. Many are taking advantage of the spare time in various ways; some are at seashore resorts, but most find much enjoyment in tenting on the shores of the beautiful little Pushaw pond, and fishing in its waters. A road has recently been completed through the woods from Mr. Tate's farm to Rogers' shore. On this shore, Dr.

Philbrick, Wesley Hunting, Dr. Cochrane, Charles Tozier and others, have bought lots, and will creet cottages. Many will probably select lots soon. This shere is about three and a half miles from East Corinth village. It is a very pretty drive, the fishing is good, and many from here and abroad resort there. This is a great addition to the many advantages which have been long appreciated by those who have year after year come to East Corinth for a summer's rest. We challenge the traveler to find a more beautiful spot than Enst Corinth.

Col. Charles Chall! Long, Bocontly Appointed by Fresident Cleveland.

Charles Challe-Long, recently appointed consul general and secretary of the legation at Corea, was born in Princess Arms, Somerset county, Md., on the 2d of July, 1842. He is directly descent at from the Huguenot family Challle, of La Rochelle and Politics, in France. In 1869, Le enlisted in the Union in France. In 1862, Le enlisted in the Union army as a private coldine, and after serving with credit, was appointed a Boutonant colonel in the Egyptian army in 1862. In March of the following year he joined Gens. Mott, Loring and Sibley, an Cairo, and was first designed to duty as professor of French in the Military academy at Abbasieh, and several mouths later as chief of the staff to the general-in-chief of the army, Ra_th, Pusha. In 1874 he was assigned to duty as chief of staff to Gen. Charles George of Gordon, then Bou

inces of Egypt. In-April he set out to:

the culture the triplematic and geographical chas CHAILLE-LONG mission, accompanied on his venturesome expension, accompanied on his venturesome expension. pedition by only two soldiers and his servants. The route of 500 miles south was vanta. The roote of soon mines south was teaming with lostile savages, who had driven the military expedition of Sir Sa nucl Baker, a few months before, out of the country. In the face of this and there difficulties Chaille-Long reached the capital of Uganda on the 20th of June, 1871. His arrival was signalized by the sacrifice of thirty human beings, he being the only white man, save Capt. Speke, who had ever visited Uganda. Chaille-Long secured a treaty by which King MTss acknowledged himself a vassal to Egypt.

After visiting the Lake Victoria, Chaille-Long turned northward to tracet the unknown part of the Nile which still left the question of that river's sources in doubt, Gen. Gordon says in his report: "Those who care to study the successive steps which huit up the map of the course of the Nile will know that to Speke is due the discovery of one perwith hostile savages, who had driver

that to Speke is due the discovery of one por-tion, to Baker that of another, and to Col. Long that of another and of the lake alluded

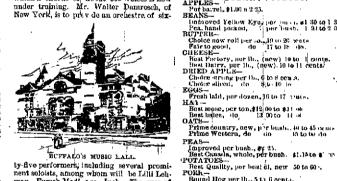

that to Spake is due the discovery of one portion, to Baker that of another, and to Col. Long that of another and of the lake alluded to."

For his success Col. Chaillo-Long was promoted to the full, rat k of colonicl and bey, and decorated with the cross of: the Commander of the Medj die.

In January, 1875, Col. Chaille-Long fitted out and led an exped tion south-restward of the Nike into the Nike into such crusty, subjected it to the au-like fitty of the Egyptian government, and dispersed the slave, trading guands which ly found there. He discovered and brought back w to him a, Tiki-Tiki or Akka woman, belonging to the dwarf races southwest and west of the Nike ind south of the fifth harellel, and has added greatly to the lifth harellel, and has added greatly to the lifth harellel, and has added greatly to the lifth harellel, and with soard-orders from the Khedive he organized an expeliition estensibly to open an equatrial raced of om the Indian ocenn along the Juba river to the central Africa Takes. The expedition satied from Suez on the 10th of Explanaive, and beceive the was extending from the Socotras to Kismayu, south of the coust and several fortified towns extending from the Socotras to Kismayu, south of the equator, and occupied a fortified teamp on the Juba river. On the capture of Kismayu, Chaille-Long found 450 slaves held in bondays by the slave trading governor of that y see, and these were forthwith emancipated. To expedition returned to Egypt in April, 1876.

On the lat of Septam er, 1877, Col. Chaille-Long resigned his commission in the Egyptian army, on jaccount of persistent jungle fevers, and returned to New York, where he studied law at Collindia college, He returned to Egypt in 1881 to practice bafore the International courts. It was while engaged in his new profession that the insureretian of Arabicular officials leaving the city, Col. Chaille-Long, in recognition of his services, and refused in interesting book for travel and a volunde entitled "The Three Prophets—Gordon, the Mahail and

Our little sen will be four years of age on the Sth hast. In May, 18ct, he was attacked with a very painful breaking out of the akin. We called in a physician who breaked him for shoot four weeks. The child received little or no good from the treatment, as the breaking out supposed by the physician to be hives in an aggrapated form, became larger in blotz es and more and more distressing. We were frequently obliged to get up in the night and rub him with sold in water, strong linimonts, etc. Finally we called other physicians, until no less than six had attempted to cure him, all sike failing, and be child steadily getting worse and worse, until about the 20th of heat July, when we begin to give him Correctal Bresch tritt. So the strongly, and by the last of August be was so nearly well that we gave him only one does of the Receivent ablu the very second day for about ten days longer, and he has never been troubled since with the horrible mainty, in all we used less than one how of calleura, and only one cake of Cut-cura Soap.
